Type: ROUTINE INSPECTION  
Date: Apr-30-2013

2.40 (b) (2)

### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The regulations state, "(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:....(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care...."

\*\*\*An older female tiger ("Molly") has an area of alopecia over her lumbar vertebrae. It is approximately 2" by 3" and has a small amount of a crusty yellowish-brown exudate on it. There is also a second spot of alopecia, approximately 2" by 3" on the right lateral side, lumbar area. This skin appears to be thickened. Skin/hair problems can cause discomfort to the animal, or could possibly spread and/or worsen. A veterinarian needs to assess and prescribe treatment for the condition.

Correct by: Licensee called attending veterinarian while inspector was present.

Discussed contingency planning and the itinerary rule.

Inspection and exit interview conducted with Licensees.
